

Autodesk Vault 2015

Top reasons to buy

Autodesk[®] Vault helps design, engineering, and manufacturing workgroups manage Digital Prototyping information.

Autodesk Vault centralizes the storage of all engineering data and related documents, helping reduce time avoid costly mistakes, and more efficiently revise and release designs.

► Seamless Autodesk CAD integration

Autodesk Data Management software – Autodesk Vault Workgroup and Autodesk Vault Professional – is tightly integrated with Autodesk design applications such as Autodesk[®] Inventor[®], AutoCAD[®] Electrical, AutoCAD[®] Mechanical, and other AutoCAD software. Deep integration makes it easy to manage data associated with your digital prototype from engineering through manufacturing – saving time and maintaining data accuracy.

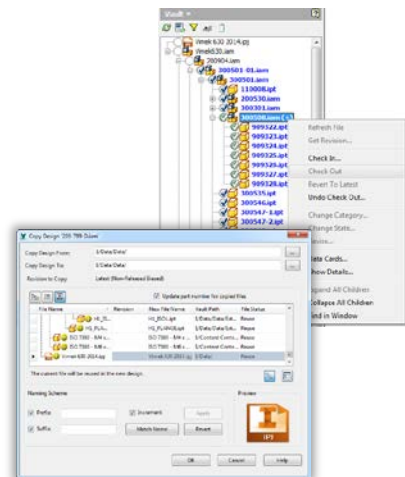

► Find data quickly

Use a range of methods, such as saved searches and shortcuts, to find and organize data. Using Autodesk Vault helps vastly reducing the time it takes to find information, so you can spend more time designing and less time searching for data.

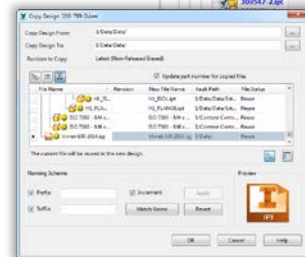

► Teamwork and collaborative design

Team members can work on a digital prototype without overwriting each other's data thanks to multiuser functionality. Team members check out a design before making modifications, then check it back in when they're done. With everyone working together, you can better balance resources, speed projects to completion, and meet tight deadlines.

► Rapidly copy and reuse data

Save hours of design time – stop manually recreating or duplicating complex models and drawing sets. Using Autodesk data management software, you can copy a digital prototype – including all related files and documentation – for use in a new design. It's easy to configure the files you want to replace, reuse, or copy.

► Simple administration and configuration

Autodesk Vault products provide tools to manage your Vault server, so it helps to maximize uptime. Intuitive administrative tools make server management easy for even those with minimal IT knowledge.

> **Control design data access with revision management**

Audit and track the revision history of your data files from a single location. Reduce the chance of design and manufacturing errors by securely releasing and tracking files throughout the design cycle, helping make sure that team members access only the correct revision of data.

> **Share data outside of the design group**

With Autodesk Vault Professional software, you can share engineering design data with the shop floor using the included web client and expose design related information to the extended enterprise and/or by publishing to the Microsoft® SharePoint®.

> **Scalability for multiple sites and large workgroups**

Multi-site functionality, available with Autodesk Vault Professional software, enables companies to synchronize design data among distributed workgroups, extending the reach of the digital prototype to the entire organization.

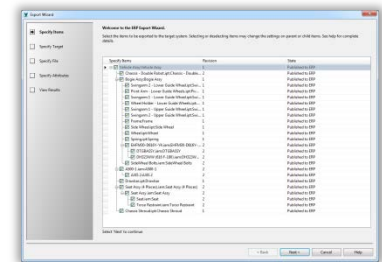

> **Automated release and change processes**

Manual processes for release and change can lead to design project delays and shop-floor errors. Autodesk Vault Professional software gives design teams the choice of standard or configurable processes for release and engineering change order management, helping them avoid costly mistakes and remove process bottlenecks.

> **Coexist and exchange data with enterprise business systems**

Take full advantage of the advanced functionality in Autodesk Vault Professional software with powerful tools to manage Bills of Materials (BOMs) and promote earlier collaboration by exchanging data with manufacturing business systems.

> **Extend value with Autodesk Maintenance Subscription**

Extend the value of your software investment with access to the latest releases and web services. Additional benefits that enhance productivity include expedited technical support and flexible licensing options. New web services help you compete more effectively by using the power of cloud computing technology for design analysis and optimization. Technical support responses delivered by Autodesk resources provide a high-quality service experience. Learn more at www.autodesk.com/maintenance-subscription*
